Features

- Implementation of all Rest API endpoints.
- Private and Public Websocket implementation
- Testnet support
- Websocket handling with reconnection and multiplexed connections

Quick start

Prerequisites

```
python version >=3.7
```

Step 1: Register an account on OKX and apply for an API key

- Register for an account: <https://www.okx.com/account/register>
- Apply for an API key: <https://www.okx.com/account/users/myApi>

Step 2: Install python-okx

```
pip install python-okx
```

API Credentials

Option 1: Hardcoded credentials

```
from okx import Account

account = Account.AccountAPI(
    api_key="your-api-key-here",
    api_secret_key="your-api-secret-here",
    passphrase="your-passphrase-here",
    flag="1", # 0 = live trading, 1 = demo trading
```

 Join us at PyCon US 2026 in Long Beach, CA starting May 13! Grab your ticket today before they're gone.

PYCON US: TICKET SALES ENDING SOON! 

Option 2: Using `.env` file (recommended)

Create a `.env` file in your project root:

```
OKX_API_KEY=your-api-key-here
OKX_API_SECRET=your-api-secret-here
OKX_PASSPHRASE=your-passphrase-here
OKX_FLAG=1
```

Then load it in your code:

```
import os
from dotenv import load_dotenv
from okx import Account

load_dotenv()

account = Account.AccountAPI(
    api_key=os.getenv('OKX_API_KEY'),
    api_secret_key=os.getenv('OKX_API_SECRET'),
    passphrase=os.getenv('OKX_PASSPHRASE'),
    flag=os.getenv('OKX_FLAG', '1'),
    debug=False
)
```

Development Setup

For contributors or local development:

```
# Clone the repository
git clone https://github.com/okxapi/python-okx.git
cd python-okx

# Install dependencies
pip install -r requirements.txt
pip install -e .
```

Step 3: Run examples

- Fill in API credentials in the corresponding examples

```
api_key = ""  
secret_key = ""  
passphrase = ""
```

- RestAPI
 - For spot trading: run example/get_started_en.ipynb
 - For derivative trading: run example/trade_derivatives_en.ipynb
 - Tweak the value of the parameter `flag` (live trading: 0, demo trading: 1) to switch between live and demo trading environment
- WebSocketAPI
 - Run test/WsPrivateTest.py for private websocket channels
 - Run test/WsPublicTest.py for public websocket channels
 - Use different URLs for different environment
 - Live trading URLs: <https://www.okx.com/docs-v5/en/#overview-production-trading-services>
 - Demo trading URLs: <https://www.okx.com/docs-v5/en/#overview-demo-trading-services>

Note

- To learn more about OKX API, visit official [OKX API documentation](#)
- If you face any questions when using `WebSocketAPI`, you can consult the following links
 - `asyncio` `websockets` document/`github`

```
